

Kharthie R

Full Stack With Gen AI Developer

✉ kharthieramakrishnan@gmail.com ☎ 6382550646 💻 Kharthie Ramakrishnan 🔗 Portfolio

👤 PROFILE

AI-focused Full Stack Software Developer with 4+ years of experience in designing and developing scalable web applications using Angular, React.js, Node.js (Express), Python (FastAPI), PostgreSQL, and MongoDB. Experienced in building Generative AI solutions using Amazon Bedrock, Azure AI, Google Vertex AI, GPT-4o, Gemini, LangChain, and LangGraph, including LLM-powered chatbots, RAG applications, agentic workflows, and AI-assisted automation. Skilled in developing RESTful APIs, cloud-native applications on AWS and Microsoft Azure, CI/CD automation, and delivering secure, scalable, enterprise-grade software solutions.

🔧 SKILLS

TECHNICAL SKILLS:

Languages & Frameworks: TypeScript, JavaScript, Python, Angular, React.js, Node.js, Express.js, FastAPI, HTML5, CSS3, Tailwind

Cloud & DevOps: AWS, Microsoft Azure, Azure DevOps, Blob Storage, Docker, GitHub Actions

Data & APIs: PostgreSQL, MongoDB, RESTful API, WebSockets, JWT, JSON Validation

Tools & Practices: Git, NPM, Yarn, Postman, SonarQube, Agile, Jira

AI / ML SKILLS:

Agentic & Orchestration: LangChain, LangGraph, Prompt Engineering, Agentic Workflows

RAG & Data: Vector Databases, Embedding Generation, Semantic Search, MongoDB

AI Application Patterns: LLM Chatbots, NL-to-Query Generation, Infrastructure-as-Code Generation (Terraform)

Generative AI Platforms: Azure AI Foundry, Amazon Bedrock, Google Vertex AI, GPT-4o, Gemini

📁 WORK EXPERIENCE

Techcedence Infosystems Private Limited : 🔗

01/2026 – 07/2026

LCP - Low Code Platform (Web APP):

coimbatore

- Developed a full-stack **Low Code Platform** using Angular, Node.js (Express), PostgreSQL, and **OpenAI (GPT-4o)**.
- Integrated **OpenAI (GPT-4o-mini) custome model** to provide AI-powered form generation, workflow recommendations, validation rule generation, and application scaffolding.
- Designed scalable backend APIs and **PostgreSQL schemas** to support configurable business workflows and **AI-generated application components**.

Vehicle Tracking Application (Web APP):

06/2025 – 12/2025

coimbatore

- Developed a vehicle GPS tracking and shipment management application using **Angular, Node.js (Express), PostgreSQL, and Azure AI Foundry**.
- Leveraged **Azure AI Foundry** to integrate foundation models for **natural language queries**, shipment status summarization, anomaly detection, and intelligent logistics recommendations.
- Implemented shipment creation, **live vehicle tracking**, and monitoring features through **RESTful APIs**.

Genworx.ai 

01/2025 – 05/2025

chennai

AWS Cloud Landing Zone (Chatbot App):

- Designed and developed a full-stack cloud infrastructure automation platform using **Angular, Node.js (Express), and Python (FastAPI)**.
- Built an **AI-powered chatbot** leveraging **OpenAI** and **GPT-4o with LangChain** to generate **Terraform modules** for **AWS services (VPC, IAM, EC2)** from natural-language prompts.
- Automated end-to-end infrastructure deployment: generated Terraform code, pushed to GitHub, and provisioned **AWS Landing Zones via agentic workflows**.
- Deployed and maintained the application on Local Server, integrating **OpenAI models** into the production pipeline.

Unit Test Case Generator - (Vs code Extention & Chatbot App):

07/2024 – 12/2024

chennai

- Designed and developed an LLM-powered **Unit Test Case Generator** using **Angular, Node.js (Express), and Python (FastAPI)** & **Azure Blob Storage**.
- Built a **ZIP file analysis engine** to detect programming languages and **auto-generate unit test cases** using **OpenAI-GPT-4o** models.
- Integrated **Langchain** for prompt orchestration, model inference, and AI service management, enabling scalable and secure test case generation.
- Led prompt engineering, backend API development, cloud deployment, and **GitHub Actions-based CI/CD automation**.

AI-based American football (Chatbot App):

01/2024 – 06/2024

chennai

- Designed and developed an **AI-powered American Football chatbot** using **Angular, Node.js, and Python (FastAPI)**.
- Implemented **CSV ingestion, embedding generation, and vector storage** using MongoDB and a Vector Database for **semantic retrieval (RAG)**.
- Built an **LLM-driven conversational interface** using **GPT-4o** and **text-embedding-ada-002** for natural-language querying of football statistics.
- Developed **natural-language-to-database query conversion**, response validation, and grounding logic.

Mediguru Global Solutions Pvt Ltd (Web App):

06/2022 – 12/2023

chennai

- **Designed and developed** a HIPAA-compliant TeleHealth platform using **React, Node.js (Express), and Microsoft Azure**.
- Implemented secure doctor-patient interactions, appointment scheduling, and virtual consultation features using **Dolby**.
- Integrated **Azure Cognitive Services for live captioning** and speech transcription during online consultations.
- Utilized **Azure Blob Storage** for secure healthcare data storage and preprocessing before database ingestion.

EDUCATION

B.E Electronics & communication Engineering

06/2017 – 05/2021

S.R.V Engineering College

CGPA - 8.5
