

Kharthie R

Gen AI - Full Stack Developer

✉ kharthieramakrishnan@gmail.com ☎ 6382550646 🌐 Kharthie R 📄 Portfolio

PROFILE

AI-focused Full Stack & AI Developer with 4+ years of experience in designing and developing scalable web applications using LLMs, Angular, React.js, Node.js (Express), Python (FastAPI), MCP, MongoDB, SQL, AI/ML PostgreSQL, and MongoDB. Experienced in building Generative AI solutions using Amazon Bedrock, Azure AI, Google Vertex AI, GPT-4o, Gemini, LangChain, and LangGraph, including LLM-powered chatbots, RAG applications, agentic workflows, and AI-assisted automation. Skilled in developing RESTful APIs, cloud-native applications on AWS and Microsoft Azure, CI/CD automation, and delivering secure, scalable, enterprise-grade software solutions.

SKILLS

TECHNICAL SKILLS;

Languages & Frameworks: TypeScript, JavaScript, Python, Angular, React.js, Node.js, Express.js, FastAPI, HTML5, CSS3, Tailwind
Cloud & DevOps: AWS, Microsoft Azure, Azure DevOps, Blob Storage, Docker, GitHub Actions
Data & APIs: PostgreSQL, MongoDB, RESTful API, WebSockets, JWT, JSON Validation
Tools & Practices: Git, NPM, Yarn, Postman, SonarQube, Agile, Jira

AI / ML SKILLS:

Agentic & Orchestration: LangChain, LangGraph, Prompt Engineering, Agentic Workflows
RAG & Data: Vector Databases, Embedding Generation, Semantic Search, MongoDB
AI Application Patterns: LLM Chatbots, NL-to-Query Generation, Infrastructure-as-Code Generation (Terraform)
Generative AI Platforms: Azure AI Foundry, Amazon Bedrock, Google Vertex AI, GPT-4o, Gemini

WORK EXPERIENCE

TECHCEDENCE INFOSYSTEMS PRIVATE LIMITED: Jun 2025 - Jul 2026 📄

Project Name - LCP - Low Code Platform (Web APP):

- Developed a **full-stack Low Code Platform** using **Angular, Node.js (Express), PostgreSQL, and OpenAI (GPT-4o)**.
- Developed **AI-powered applications** using **Large Language Models (LLMs)** to automate **business workflows** and improve user interactions.
- Designed and implemented **multi-agent AI workflows** for task automation and intelligent decision-making.
- Designed scalable **backend APIs** and **PostgreSQL schemas** to support configurable business workflows and AI-generated application components
- Designed scalable **backend REST APIs** and **PostgreSQL schemas** to support configurable business workflows and **AI-generated application components**.

Project Name - Vehicle Tracking Application (Web APP):

- Developed a **vehicle GPS tracking and shipment management application** using **React, Node.js (Express), PostgreSQL, and Azure AI Foundry**.
- Leveraged **Azure AI Foundry** to integrate **foundation models** for **natural language queries, shipment status summarization, anomaly detection, and intelligent logistics recommendations**.
- Integrated **Google Maps and Google Maps APIs** with **GPS-based live monitoring** to visualize **real-time vehicle locations**, track routes, and review **historical vehicle movements** for efficient shipment management.

- Integrated **Google Maps** and **Google Maps APIs** for processing and transforming **vehicle telemetry, shipment, and tracking data** to support **analytics and AI-powered logistics use cases**.

GENWORX.AI: (Formerly Mediguru Global Solutions Pvt Ltd): Jan 2025 - May 2025 [↗](#)

Project Name - AWS Cloud Landing Zone (Chatbot App):

- Developed RESTful APIs using **React, Python and Node.js** to support AI-driven applications.
- Experience working with **Large Language Models (LLMs)** and Generative AI technologies. Experience with prompt engineering and AI workflow optimization.
- Designed database schemas and managed application data using **MongoDB** and **SQL**.
- Built an **AI-powered chatbot** leveraging **OpenAI** and **GPT-4o with LangChain** to generate **Terraform modules** for **AWS services (VPC, IAM, EC2)** from natural-language prompts.

MEDIGURU GLOBAL SOLUTIONS PVT LTD: (now rebranded as GenWorx): Jun 2022 - Dec 2024 [↗](#)

Project Name - Virtual Doctor–Patient Consultation Platform (Web App):

- **Designed and developed** a HIPAA-compliant TeleHealth platform using **React, Node.js (Express)**, and **Microsoft Azure**.
- Implemented secure doctor-patient interactions, appointment scheduling, and virtual consultation features using **Dolby**.
- Integrated **Azure Cognitive Services for live captioning** and speech transcription during online consultations.
- Utilized **Azure Blob Storage** for secure healthcare data storage and preprocessing before database ingestion.

Project Name - Unit Test Case Generator - (Vs code Extention & Chatbot App):

- Designed and developed an LLM-powered **Unit Test Case Generator** using **Angular, Node.js (Express)**, and **Python (FastAPI)** & **Azure Blob Storage**.
- Built a **ZIP file analysis engine** to detect programming languages and **auto-generate unit test cases** using **OpenAI-GPT-4o** models.
- Designed and optimized responsive frontend applications using **Angular** to interact with **AI-powered backend services** and Integrated **Langchain** for prompt orchestration, model inference, and AI service management, enabling scalable and secure test case generation.
- Led prompt engineering, backend API development, cloud deployment, and **GitHub Actions-based CI/CD automation**.

Project Name - AI-based American football (Chatbot App):

- Designed and developed an **AI-powered American Football chatbot** using **Angular, Node.js, and Python (FastAPI)**.
- Implemented **CSV ingestion, embedding generation, and vector storage** using MongoDB and a Vector Database for **semantic retrieval (RAG)**.
- Built an **LLM-driven conversational interface** using **GPT-4o** and **text-embedding-ada-002** for natural-language querying of football statistics.
- Developed **natural-language-to-database query conversion**, response validation, and grounding logic.

EDUCATION

B.E - Electronics & Communication Engineering

S.R.V Engineering College

06/2017 – 05/2021

CGPA - 8.5
