PROFILE

Innovative Software Engineer with expertise in Full Stack Development, Cloud Engineering, and Generative AI solutions. Possessing strong experience in designing and developing enterprise-grade applications using Angular, React.js, Node.js, Python, MongoDB, PostgreSQL, AWS, and Azure. Successfully delivered AI-driven products including cloud infrastructure automation platforms, intelligent chatbot systems, automated test-case generators, and healthcare applications. Strong problem-solving abilities combined with a product mindset focused on scalability, performance optimization, user experience, and business value creation.

WORK EXPERIENCE

Techcedence Infosystems Private Limited  01/2026 – Present

LCP - Low Code Platform (Web APP):

Worked as Full Stack Developer using **Angular** for frontend , **Node.js** (express Framework) for backend.

Build a Dynamic Builder Module based Application with **Postgres SQL**.

Vehicle Tracking Application (Web APP): 06/2025 – 12/2025

Worked as a full stack developer using **Angular** and **Node** vehicle GPS tracking management with shipment creation.

Genworx.ai  01/2025 – 05/2025

AWS Cloud Landing Zone (Chatbot Application):

- Worked as a Full Stack Developer using **Angular** for (frontend), **Node.js** and **Python** (FastAPI) for backend development.
- Built a cloud infrastructure automation tool to generate **Terraform modules** for **AWS (VPC, IAM, EC2)** using **GPT-o** via **Langchain** and **LangGraph** frameworks.
- Automated deployment workflows: generated Terraform, pushed to **GitHub**, and deployed Landing Zones into the **AWS Console**.
- Deployed in **AWS**.

Unit Test Case Generator -(Vs code Extention & Chatbot Application) 07/2024 – 12/2024

- Worked as a Full Stack Developer using **Angular** for (frontend) , **Node** (backend) and **Python (FastAPI)** for backend development. chennai
- Developed an **LLM**-based test case generator which analyzes uploaded **ZIP** files, identifies file types, and generates unit test cases automatically using **GPT-o**.
- Integrated file upload processing, **metadata extraction**, and dynamic test case generation in a seamless UI/UX workflow.
- Collaborated on **prompt** design, API development, cloud integration, and **GitHub actions** for DevOps automation.
- Deployed in **AWS**.

AI-based American football (Chatbot Application) 01/2024 – 06/2024

- Worked on an AI-based American football chatbot platform using **Angular** (frontend), **Node.js** (backend), and **Python** (FastAPI) for **AI logic**. chennai

- Enabled uploading and **embedding** of **CSV files** into **MongoDB** and **vector DB**, converting tabular data into queryable formats.
- Designed a real-time **LLM-powered** chatbot using **GPT-o** and **Gemini**, allowing users to ask natural language questions and filter football data (by year, week, player, etc.).
- Built logic for natural language to **DB query**, **Data validation**, and Query results back to NL, with a real-time chat interface using **WebSocket communication**.

Mediguru Global Solutions Pvt Ltd [🔗](#)

06/2022 – 12/2023

TeleHealth Plaform - Virtual Appointment Booking (Web-app)

- Used **React** for frontend, **Node.js** (Express) for backend services, hosted on **Microsoft Azure**.
- Developed a **HIPAA-compliant** virtual healthcare web platform enabling secure **doctor-patient interactions**, appointment bookings, and **live consultations**.
- Integrated **Azure Cognitive Services** for **live captioning** and **transcription** in virtual meetings, improving accessibility.
- Implemented **Azure Blob Storage** to securely store and pre-process **critical healthcare** data before DB ingestion.
- Ensured web accessibility standards were met across all modules to support a wide user base.

SKILLS

HTML5, CSS3, TypeScript, Node.js, JavaScript, Angular, Tailwind, Express.js, Git, NPM, MongoDB, Yarn, RESTful API, Web Sockets, JWT, Azure Devops, Blob Storage, JSON Validation, Postman, Jenkins, Docker, SonarQube, Argo CD, Agile, Jira, Python, FastAPI, React.js
